# DAMP GONE XTREME

Advanced Liquid Water Repellent Technology

**DAMP GONE XTREME** is a high-performance, solvent-free water repellent designed for the hydrophobic impregnation of mineral construction materials. It reacts with atmospheric CO<sub>2</sub> to create a durable, water-resistant barrier deep within the surface.

## KEY BENEFITS

- ✓ 100% active, solvent-free formulation
- ✓ Works even in high moisture conditions
- ✓ Deep penetration technology
- ✓ No harmful salts released
- ✓ Suitable for multiple surface types
- ✓ Can be applied by spray

## HOW IT WORKS

### Hydrophobic Protection Technology

- Penetrates deeply into material
- Reacts with CO<sub>2</sub>
- Creates invisible water-repellent barrier
- Allows surfaces to breathe

Hydrophobic Protection Technology

## APPLICATIONS

- ✓ Face brick
- ✓ Boundary walls
- ✓ Natural stone
- ✓ Plastered walls (interior & exterior)
- ✓ Paving & planter Boxes
- ✓ Concrete slabs
- ✓ Roof tiles & slabs
- ✓ Rising damp
- ✓ Gypsum boards & fibre boards

AND MORE...

## TECHNICAL SNAPSHOT

Property	Value
Active Substance	Silane-Siloxane
Appearance	Clear to slightly yellow
Density	±1.4 g/cm <sup>3</sup>
Solid Content	15%–20%
pH	13–14
Water Bead	Yes

## APPLICATION GUIDE

1. Ensure surface is dry (< 20° moisture reading).
2. Apply using spray (preferred) or brush.
3. Apply **2 coats** wet-on-wet (2 min gap)
4. Allow to dry before painting
